# HARLEQUIN SET UP

MODELS: AF330,AF345,AF360
POP UP TENT | *Harlequin*

Thank you for choosing the Harlequin.

The Harlequin pop up canopy tents are intended for frequent use. This aluminum frame is lighter and stronger than its steel counterpart and still comparable in price. With a polyester canopy and walls this canopy tent is well suited for markets, trade shows, sporting events or any other type of event.

*For an optimal use of this product we invite you to follow our setup guide.*

TOP INSTALLATION
1 Position the frame

Open the frame 40% of the way

2 Position the top

With two people, open the roof and grab at each corner. Correctly position the peak and the corners of your top.

3 Secure the top to the frame

(!) Do not tighten the Velcro on the roof during the assembly of the canvas.

A   B   C

Once each corner of the top is correctly placed on the corners of the structure (A) attach the Velcro straps in the corners like as shown above (B), finally open the tent all the way and attach the Velcro straps in the center of the valences to the scissors like as shown above (C)
FRAME DEPLOYMENT

1 Position the frame

Place the tent on a flat surface, standing upright on its 4 feet. Then loosen the roof strap.
2 Deploying the structure

(!) Do not grab or pull at feet.

Open the structure 60% of the way then position 2 people face to face, grab the scissors and pull while backing up.

FRAME DEPLOYMENT

**3** Corner lock with button

A

B

C

CLICK!

Push point A) towards point (B) until you hear a click. Once you hear the click the locking system will be locked into place and your tent will be secure (C). Repeat on all legs.

4 Height adjustment

B

A

C

(!) Do not force the frame. Close the frame and check for blockage

Adjust the height of the tent using the extendable legs. To do this, press the button (A) and lift the upper part of the leg (B). The lower part must slide by itself (C).
You can choose between 3 height settings. The walls are provided for the maximum height. (When extending the legs do not stand on the foot plate)
WALL INSTALLATION

1 Wall installation
Position the wall so that the Velcro strip on the top of the face the outside of the tent. Attach the Velcro to the roof strip (Inner side).
2 **(!)** If you mount several walls the vertical Velcro attaches to the next wall.

Attach the Velcro strips on both sides around the legs of the tent.

**3** Opening the door/window wall curtain

Unzip the two vertical zippers (door only), roll the door/curtain and hang it with the Velcro strips on the top of the wall.

WEIGHTING & ANCHORING

1 Weighting

Ⓐ

Place the weight on the foot plate of your tent (A). Stack any extra weights if necessary.

2 Anchoring

Ⓐ

Attach the carabiners to the scissors points on each corner of the tent (A). Place the stakes at a minimum distance of 3ft.

CLEANING & MAINTENANCE

1 Cleaning the roof, walls and frame:

• Wash with a damp cloth and soapy water (no abrasive sponge or detergent).
• Rinsing possible with a hose (high pressure not recommended).
• Air dry before storing.
• To remove dirt, grass, clean the frame with a damp cloth (No detergent).

2 Storing:

• Wash and dry before storing.
• Store the tent upright in its carrying case.
• Store the material in a dry place not subject to high humidity.

3 Transportation:

• Transport the tent preferably upright.
• In case of horizontal transport, do not put weight on the structure.
